EDUCATION

PCP (Polytechnic)

Computer Engineering / Science studies

CORE SKILLS

HTML5 CSS3 JavaScript ReactJS
NodeJS Python Java C XML
Microservices Spring Boot

LANGUAGES

- Marathi (Native)
- English (Professional)
- Hindi (Professional)

INTERESTS

- Web Application Development
- Automation & Scripting
- Open Source Projects
- Continuous Learning

PROFESSIONAL SUMMARY

Aspiring software developer currently learning and building projects using C, Python, Java, and JavaScript. Passionate about continuous learning and software development, with a solid foundation in both frontend and backend concepts. Active contributor on GitHub, dedicated to exploring modern frameworks and implementing clean code practices.

KEY PROJECTS

AI Virtual Mouse

[GitHub Link](#)

Built a virtual mouse system in Python utilizing OpenCV and Mediapipe. Recognizes hand gestures via a standard web camera to perform mouse operations (moving cursor, left/right clicks) contactlessly.

BankApp (Spring Boot)

[GitHub Link](#)

Developed a web-based banking application using Spring Boot. Features user authentication, secure account balance checking, transaction processing, and database integrations.

PayPal Payment Gateway

[GitHub Link](#)

Implemented a secure PayPal Payment Gateway integration in Spring Boot to handle and verify online transactions securely.

Eye Controlled Mouse

[GitHub Link](#)

Created an assistive technology solution utilizing Python and eye-tracking concepts to track eye movement and direct the mouse cursor dynamically.

Weather Apps (Python & JavaScript)

[GitHub Link](#)

Designed responsive applications in both Python and JavaScript that fetch real-time atmospheric data from third-party APIs to report temperature, humidity, and weather conditions.
